

31. The gene product of claim 28 wherein the antigen is influenza virus hemagglutinin.

32. The gene product of claim 28 wherein the antigen is hepatitis B virus surface antigen.--

---

REMARKS

The Title and Abstract have been amended to more closely reflect the claimed subject matter.

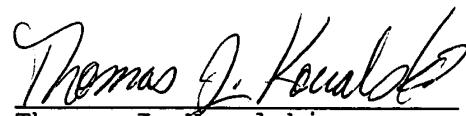

The specification has been amended to give the pedigree of this application and to make the same amendments made in the immediate parent application.

In order to ensure compliance with all of the requirements of 35 U.S.C. 112, applicants declare that all restrictions upon availability to the public for the deposits with the American Type Culture Collection indentified on page 7 of the application will be irrevocably removed upon the granting of a patent.

Early and favorable consideration on the merits is earnestly solicited.

Respectfully submitted,

CURTIS, MORRIS & SAFFORD, P.C.  
Attorney for Applicants
